

6516206228.txt

Unfortunately, the push by broadcasters and through their lobbyists, some members of congress, is nothing more than their way of stifling competition. Do they honestly believe that if satellite radio offers weather and road conditions that this will hurt their profits?

Additionally, I believe that the offering of this information on satellite radio is a matter of public safety. I know I can instantly get this information as I travel through different cities without have to search the radio.
